

Citibank

3th May 2005

The implementation of Performa has been a success.

So far, we have managed to integrate this application to our Information portal.

We find that the Business Intelligence application from your company meets our objectives. The software provides a very comprehensive view of the Dashboards with analytical capabilities. The interface is very user friendly and easy to navigate. With your understanding of Business Intelligence, it really makes it easier for us to implement the BI solution together.

I am very thankful for the tremendous support and dedication from you and your team. They are very responsive and professional in the project implementation.
