

## **Epson**

4th January 2006

On behalf of my IT department at Epson, I am pleased to write this letter of referral for the Performa BI Suite.

It has been three (3) years now that we have used Performa BI Suite products at Epson. My team and I find Performa to be very stable and easy to maintain. So far, we have close to 200 users for Performa at Epson and they find it very helpful and useful in the analysis of multidimensional data. We have also built quite a number of OLAP cubes and deploy it with Performa as the front - end BI solution.

We would definitely look into new products from Performa in the near future to complement the solution that we have purchased. Once again, I appreciate all the excellent commitment and support from the Performa team.
