

Time Reach

1st March 2007

It has been close to three (3) years now that we have used Performa BI in Time Reach. The users are very pleased with the features and functions of Business Intelligence solution in Performa and have helped them a lot in analyzing the data trend especially in identifying the critical areas that impact the business.

We, IS team feel that Performa has minimized our time in processing the strategic information and therefore we have sufficient time to focus in other IS area.

Last and not least, I am very thankful for the support and dedication from the Performa BI team. They have been very responsive and professional in the project implementation

Head of IS, Time Reach
